

**TOWN OF TECUMSEH
WATER AND WASTEWATER MASTER PLAN UPDATE
NOTICE OF PUBLIC INFORMATION CENTRE**

The Town of Tecumseh completed a Water and Wastewater Master Plan in 2002 and an amendment in 2005. The completed Master Plan and amendment identify the long-term water and wastewater servicing strategies and associated capital projects to serve the urban settlement areas in the Town of Tecumseh. In light of recent legislation and new servicing agreements executed with the City of Windsor, the Town of Tecumseh has initiated an update to the Water and Wastewater Master Plan to confirm and update the preferred water and wastewater servicing strategy. The updated servicing strategy is required to support growth in the Town and continue to provide a high level of service in the existing service areas.

The Water and Wastewater Master Plan Update is being completed under the Municipal Class Environmental Assessment (September 2007). This process integrates planning for municipal infrastructure requirements with the principals of environmental assessment planning.

As part of the Class EA process for the Water and Wastewater Master Plan Update, Public Information Centres (PIC) will be held in the north and south service areas of the Town to provide members of the public and interested groups with an opportunity to review and comment on the available project information and the updated water and wastewater servicing strategies.

The PICs will be structured as an open house with displays available for walk-through during the times noted. Staff from the Town of Tecumseh and KMK Consultants Limited will be available to answer questions. The schedules for the PICs are:
