Comments

It is recommended that the progress outlined in this report be received.

As priorities are not intended to communicate everything that the Town plans to achieve by the end of 2018, they should not be static; if the strategic environment changes, then priorities may need to be adjusted. Progress on the implementation of the strategic actions and priorities will continue to be provided to Council.

Finally, it is critical that the leaders of the municipality, both elected and administrative, understand the priorities when considering the policies and future direction of the municipality. The elements of a strategic document identify the Town’s priorities, which in turn provide the framework for the allocation of funds, development of work plans, reports and dedication of resources.
